

## Science for an Ocean Nation: Update of the Ocean Research Priorities Plan

---

By Subcommittee on Ocean Science and Techno

Createspace, United States, 2014. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.The environmental integrity and sustainable productivity of the ocean, our coasts and coastal watersheds, and the Great Lakes play a central role in the well-being of all Americans. Every day, the marine environment supplies a multitude of products and services that enhance and support the lives and livelihoods of citizens. In 2011, Americans, on average, ate 15 pounds of fish and shellfish per person - 4.7 billion pounds all together - making the United States second in the world in total seafood consumption. Offshore oil production in Federal waters accounts for fully 24 percent of total U.S. crude oil production. More than half of the United States population lives in coastal watershed counties, and these counties generate 58 percent (\$8.3 trillion) of the Nation s gross domestic product (GDP)-even though they comprise only 25 percent of the Nation s land area. If American coastal watershed counties were considered an individual country, that country would have a GDP higher than that of China. Recognizing the central role these environments and their resources play, and the many sometimes competing demands...
